NURSERIES Bridgman, Michigan

new 20th century EVERBEARER

AMERICA'S LARGEST EVERBEARER — HONEY SWEET

4-513 — A New Everbearer that has both "EYE" and "TASTE" appeal! PLUS being a "TOP PRODUCER". Bears fruit 60 days after planting. 3 Big Crops in 18 months. Bears until heavy frosts in the Fall. Excellent fresh or frozen — a flavor you'll never forget. Bright red color all the way through. Berries are round, of exceptionally large size from the first picking to the last. Fruit is uniform in size and has a rich red coloring all the way through; is very firm, which makes it excellent for distant shipping. FLAVOR of the best — we have never tasted a sweeter Everbearer — real honey-sweet! Also retains this delightful flavor when frozen. One of the best for freezing, jams and jellies.

HEAVY PRODUCER. Starts bearing 60 days after planting and continues until frost stops them in the fall. Its yields are very heavy; records indicate this variety has produced 750 pints of berries from 500 plants, from July through November. Give it a try!

Adaptable to all soils and all climates. You are always sure of a good fruiting row with 20TH CENTURY. This is our choice of all the Everbearers.

PRICE: 25 for \$2.25; 50 for \$4.25; 100 for \$7.50; 250 for \$17.50; 500 for \$30.00; 1,000 for \$55.00.

new EARLY RED RED RASPBERRY

1-20 — Originated by Stanley Johnston of the South Haven Experiment Station. EARLY RED is a cross between Lloyd George and Cuthbert varieties. After 12 years of testing and growing on a commercial scale EARLY RED has proved its superiority. Berries ripen very early, are large, round-conic, and light red in color. Quality and flavor make them perfect for canning and freezing. Ripen 10 days earlier than Latham, thus commanding premium prices on the market. Plant is hardy, vigorous, and very productive. "EARLY RED" for Higher Prices, Early Ripening, Good Flavor and Quality, For Freezing, and Productiveness.

PRICE: 6 for \$1.65; 12 for \$2.75; 25 for \$4.95; 50 for \$8.75; 100 for \$15.00; 250 for \$33.50; 500 for \$60.00; 1,000 for \$100.00. See page 12 for Transplants.

RED-GOLD GIANT THE IMPROVED HALE!

Bears Young - Fine Shipper - Exceptionally Hardy!

1-38 — Truly the GIANT of the Peach family — many peaches weighing 1 pound each — the largest Peach we have ever seen. The new variety is a bud-sport of the common Hale, but is much larger, and bears heavier, with no signs of "little peach" so common in Hale. A late midseason variety that is almost fuzzless. Ripens a week later than J. H. Hale, when Peaches are bringing a premium price. A perfect freestone. An excellent shipper. Bears at an early age — often one-half bushel the second year. Very hardy. Tree is a more thrifty grower than Hale, and seems to be more resistant to brown rot than other kinds.

ORIENTAL ROSE VINE

(Convolvulus Japonica Flora Plena)

An outstanding plant with a two-fold purpose — excellent as a ground cover for those hot, sunny banks and other open areas where a low-viny growth is wanted, or to cover that space between the house and sidewalk. Also ideal for covering fences and trellises where great height is not needed.

Beautiful clear pink flowers are so large and fully double they resemble roses: these fully double flowers are two to three inches across and are produced in great abundance all summer long.

These root-hardy vines literally bloom themselves upward as they grow to a height of about six feet. Once established, these plants will take care of themselves and reward you with beauty throughout the growing season. Roots should be planted 12 to 18 inches apart and about one to two inches deep.

PRICE: 4½ to 6-inch roots, with 4 to 6 eyes, 75c each; 3 for \$2.10; 6 for \$4.00; 12 for \$7.00.

BIG GIFT PLANTING

For Early Cash Orders

To every customer who sends us an order before April 1st, 1955 accompanied by cash in full at regular catalog rate (this doesn't apply on bargains or special quotations), and who in addition sends us the names and addresses of three fruit growers, or purchasers of nursery stock, we will include without charge the following number of Oriental Rose vines.

2 Oriental Rose Vine (Priced at \$1.50) with cash orders between \$5.00 and \$10.00.

5 Oriental Rose Vines (Priced at \$3.50) with cash orders for \$10.00 or more.

On Cash Orders between \$2.00 and \$5.00, we will include enough RA-PID-GRO (described on page 12) to make 1½ gallons of liquid Plant Food, providing requested names accompany order.

Be sure to send the three names and addresses with your order (Use space provided on the order sheet.) The gift positively will not be sent unless customer complies with this condition. This offer open until April 1st, 1955. Our supply of the Oriental Rose Vine is too limited to make this offer effective after April 1st. On all cash orders received after April 1st, when accompanied by three names referred to, we will include the Oriental Rose Vine if still available: but if not, we will include additional nursery stock of our own selection as to variety and value.

No special bargain collections are included in this gift planting offer. Nor cash orders where a special reduced price has been quoted.

We Aim to Tell You the Truth—We Are Farmers, Too, and Don't Try to Sell You Any Varieties We Ourselves Would Not Plant

No Cash Payment Before Shipment

You examine stock before you pay. This offer applies only on orders amounting to \$3.00 or more, for shipment on or before April 25, 1955.

We are one of the first nurseries in this section of the country to adopt this unique selling plan, whereby it is possible for customers to order without senders to order at full prices listed in any money. Make out your order at full prices listed in catalog, and instruct us to ship C.O.D., express or parcel post, subject to your examination by express only, as the postal authorities do not permit examination of parcel post shipments.

Look over the shipment and see for yourself whether the stock is in good condition. If shipment is satisfactory, pay your express agent the amount due and the plants are yours—still covered by our guarantee. What could be more fair? We simply must furnish good nursery stock or we couldn't possibly afford to make this offer.

We would advise all small shipments sent by mail, and will send your order by parcel post C.O.D. for purchase price, plus postage, if you prefer. All such shipments are fully covered by our guarantee.

NOTICE: The above offer does not apply on orders amounting to less than \$3.00; on Special Bargain Collections; Special Quoted Prices; nor on any orders specifications; Cash in full flying shipments later than April 25th, 1955. Cash in full must accompany orders under \$3.00, or those calling for shipment later than April 25th; but on such orders customers will be entitled to our cash discounts from regular catalog rates, as explained at the right.

WE GUARANTEE SAFE ARRIVAL OF ALL SHIPMENTS MADE ON OR BEFORE MAY 25th, 1955.

We reserve the right to cancel all printed prices without notice.

Order Early and Make a Big Saving

10% DISCOUNT ON ALL CASH ORDERS
(Except on Bargain Offers and Special Quotations) Received before February 1st, 1955.

To those who wish to send all cash with order, we offer these special cash discounts from our regular printed prices (except on Bargain Offers and special quotations).

Pay Cash and Save Additional Cost on C.O.D. Shipments

Some concerns add 5 per cent to their list price, in addition to the required C.O.D. fees, if order is for C.O.D. shipment. Knowing our stock will be satisfactory, we will ship C.O.D., if you prefer, at our regular printed price, although we want to remind you of the collection and money order fees on C.O.D. shipments. These charges, over which we have no control, or do not receive one cent of the fees, amount to approximately 5 per cent on average orders. You can save this 5 per cent by sending cash with order. You take no chances—all shipments are backed by our guarantee.

**EXPERIENCE IS YOUR ASSURANCE
OF TOP QUALITY AND FAIR PRICES**

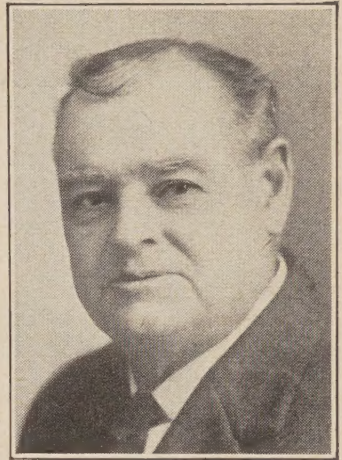

With this, our 64th year, of doing business with the general Farmer and Home Owner, it is my pleasure to thank our many customers, new and old, for the fine business you have placed with us. We have endeavored to fill your orders with the finest Nursery Stock that can be grown, and our increasing list of satisfied customers is a tribute to our policy of the old-fashioned "farmer-to-farmer" square deal, and the principles of our founder, F. L. Ackerman, who said "work hard and well, and remember your responsibilities to those with whom you deal."

"We work in close cooperation with the State Dept. of Agriculture, and all of our stock is certified free from disease and true-to-name. We propagate from our own budding blocks, so you are sure to get the variety you order."

"Ackermans are members of the National and Michigan Associations of Nurserymen and the National Mail Order Nurseryman's Association."

"PLACE YOUR ORDER EARLY" We are offering special discounts for all cash with orders placed early in the season, for we can take care of this work much easier before our shipping season opens up. Our shipping season usually starts the last week in February and continues through March, April, May and June. However, dormant trees and shrubs can be shipped to the southern states earlier. If a specified date is given as to time of shipment, we will try and ship as near that time as possible; if not, we will ship at proper planting time for your locality. We feel sure your cooperation in placing your order early, so it may be booked before our rush season is on, will enable us to accommodate all of our customers in a very satisfactory manner.

"We are confident we can fill your order with the finest Northern grown Nursery Stock that can be grown, and that you will be satisfied in every way. We know you will be glad you tried ACKERMANS."

OUR GUARANTEE

We guarantee all of our nursery stock to be just as represented in our catalog; fully up to grade, of good quality, free from disease, and absolutely true to name; also to reach the customer alive, and in perfect growing condition.

Furthermore, we will, at our option, either replace free of charge, or refund purchase price on any stock that arrives in bad condition, providing claim is made within 10 days after arrival. After 10 days, it is mutually agreed that stock is satisfactory. If stock is unsatisfactory on arrival, be sure to get signed statement from your express agent or postmaster showing extent of damage, and send this along with your claim. For Berries from June to Frost Plant

EVERBEARING STRAWBERRIES

New **RED RICH**

EVERBEARING STRAWBERRY

(Plant Patent No. 993)

A comparatively new Everbearer which has all the superior qualities you have been looking for. Berries 90 days after planting — **TWO CROPS in one year**. A cross between the Wayzata Everbearing and the Fairfax. Has retained the honey-sweet flavor of Wayzata and the high yielding ability of Fairfax, plus being a good plant maker. **STRONGEST GROWING PLANT** we have ever seen. **ATTRACTIVE RED GLOSSY COLOR**. Berries are rather round, a beautiful rich red all the way through; flesh is firm, core is small, and the berry ripens evenly under normal conditions. **UNSURPASSED FOR FREEZING**.

BIG PROFITS. Records kept by one Minnesota grower state that his Red Rich Everbearing produced 4,000 quarts on one acre.

GOOD SHIPPER. Berries which were rather ripe when picked were still salable after 3 days in room temperatures. When kept in refrigerator, the berries were still good after 10 days.

Plant this variety this spring and be ready to supply your market when they demand a fine Everbearer of this type.

PRICE: 12 for \$2.95; 25 for \$5.00; 50 for \$8.50; 100 for \$15.00; 250 for \$32.50; 500 for \$55.50. Net, no further discount.

Red Rich

Superfection
EVERBEARER

Bears Fruit from June to Frost!

4-508 — Berries are exceptionally large, roundish in shape; are dark red all the way through. Superfection has a zippy, sweet flavor, fairly melts in your mouth. Berries are of firm texture, will withstand long-distance shipping without discoloration or softening of berries, which is quite common with most all everbearers. **TWO CROPS in one Year** — starts ripening early July and continues on until frost, and then the following spring has a heavy crop in June, plus another crop that Fall. An excellent plant maker. A hundred plants in your garden will produce enough berries for an average family. The originator of this variety was Mr. Keplinger, of northern Michigan, the man who discovered the famous Gem — you are assured of the best. **PRICE:** 25 for \$1.75; 50 for \$2.75; 100 for \$4.50; 250 for \$9.50; 500 for \$16.50; 1,000 for \$30.00; 2,000 for \$55.00.

EVERBEARING STRAWBERRY

4-501 — An older variety of the Everbearers which holds its own and stands on its record. Berries within 90 days after planting; heavy producer of real large, beautiful red berries which are almost round in shape. Has a full strawberry flavor. No green tips, for it ripens evenly. Excellent variety for freezing. An excellent plant maker. **PRICE:** 25 for \$1.75; 50 for \$2.75; 100 for \$4.50; 250 for \$9.50; 500 for \$16.50; 1,000 for \$30.00.

Premier

Famous **PREMIER** Best Early **STRAWBERRY**

Still the leading early berry.

4-504 — A standard of excellence with all growers, and the earliest worthwhile Strawberry of the older varieties. A great money-maker, for it yields its fruit crop at a time when strawberries are in great demand and sell at fancy prices. Premier is as nearly frost-proof as any strawberry can be. It is unusually healthy, being free from leafspot and other diseases. Its deep, heavy roots enable it to withstand dry weather and mature a full crop of big berries when many varieties are a complete failure. Large, bright red, firm berries of fine texture and flavor.

PRICE: 25 for \$1.25; 50 for \$2.15; 100 for \$3.15; 250 for \$6.75; 500 for \$9.75; 1,000 for \$17.00; 2,000 for \$32.00; 5,000 for \$77.50.

ROBINSON Best Late **STRAWBERRY**

4-506 — This berry was originated by John Haley of Southern Michigan. It is a cross between Premier and Washington. The best medium to late—10 days to 2 weeks later than Premier. In our 50 some years of growing strawberries, Robinson is the largest berry we have ever seen—30 berries will fill a quart. In fact, one of our Montana customers says some of her Robinson measure 6 to 6½ inches in circumference and inquired how much bigger they have grown, and one of our Michigan customers states he may elect to sell his berries by the dozen—or yard, for just 18 of the giant Robinson berries filled a quart container, and that they averaged “six berries to the foot.” This variety has been grown commercially for the past ten years in Michigan; has produced a wonderful crop of fruit every year under most unfavorable conditions—farmers netted over \$1,000.00 an acre from this variety.

Berries are extremely large, and honey-sweet. Color is decidedly a cardinal-red, and this berry may be offered under this name. Berries have a firm, tough skin, making it an excellent shipper to distant markets.

Excellent plant maker on any soil.

Premier and Robinson, two of the best varieties, will give you berries over the entire season.

Price: 25 for \$1.10; 50 for \$1.80; 100 for \$2.95; 250 for \$6.25; 500 for \$9.45; 1,000 for \$17.00; 2,000 for \$32.00; 5,000 for \$75.00.

NEW SPARKLE

RED STEEL RESISTANT

4-512 — Exceptionally prolific plant maker with good healthy foliage. Especially adapted to northern climates. Its resistance to Red Stele root rot make this one of the most promising varieties. Heavy producer. Berries round, medium to large, uniform in shape, and as its name indicates, has a bright, rich-red color, with a shiny, sparkling skin which makes them very attractive. Quality of berry is good. Ripens midseason, being a little later than Premier.

PRICE: 25 for \$1.25; 50 for \$2.15; 100 for \$3.15; 250 for \$6.75; 500 for \$9.75; 1,000 for \$17.00; 2,000 for \$32.00; 5,000 for \$77.50.

ARMORE The "BIG" late berry

4-516 — (Late midseason) BIG is the word for Armore. BIG producer. BIG berries. Big harvests when the other June berries are through. Armore is the result of years of testing by the Missouri Experimental Station. Tests the past two years, have proven Armore has produced more fruit of larger size and better color than any other of the new sorts. Unrivalled for flavor — unbeatable for sugar sweetness. Armore is a perfect shipper and makes a fine picking row on light soil. If you want a quality berry, try Armore this year.

PRICE: 25 for \$1.75; 50 for \$3.00; 100 for \$3.50; 250 for \$7.50; 500 for \$11.00; 1,000 for \$20.00.

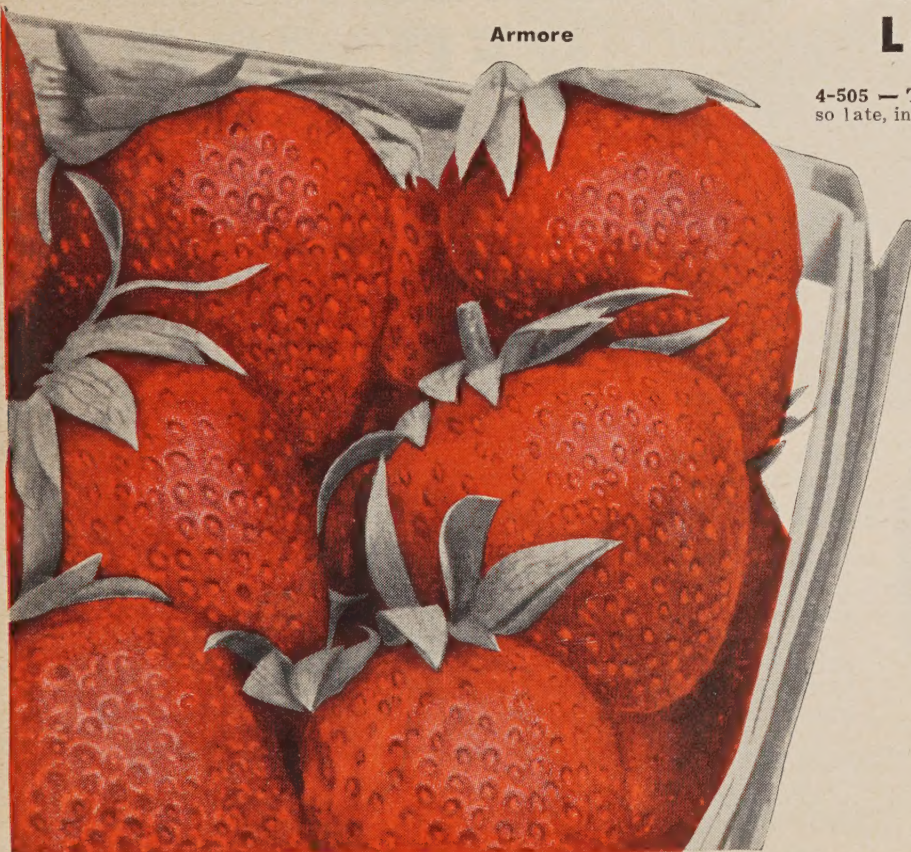

NEW TEMPLE RED STEEL RESISTANT

Tolerant to Wet Conditions

4-509 — A variety "made-to-order" to take care of the Red Stele menace. Excellent plant maker, and especially vigorous and productive. Berries are medium to large, and beautiful red in color, blunt, conic, smooth, uniform, and of very good quality; an excellent shipper. Ripens nearly as early as the well-known Blakemore — one of the first. Tests have proven it will grow and produce on soils infested with Red Stele. PRICE: 25 for \$1.25; 50 for \$2.15; 100 for \$3.15; 250 for \$6.75; 500 for \$9.75; 1,000 for \$17.00; 2,000 for \$32.00.

JUMBO Extra Large

A new midseason June-bearing Strawberry that has so many good points, we believe will soon be the All American June-bearing strawberry. As the name implies berries are very large, are deep red all the way through, and are chock-full of real honey-sweet goodness. Berries are firm and solid, making it a good variety for long distant shipping. Plants are strong, vigorous and very healthy; makes an excellent fruiting row. In actual freezing tests, Jumbo rated superior and records prove it is one of the heaviest yielding strawberries known. We know the supply of this wonderful new variety is not near enough to take care of the demand — order early and do not be disappointed. PRICE: 25 for \$2.25; 50 for \$3.50; 100 for \$5.00; 250 for \$10.00; 500 for \$17.00; 1,000 for \$28.00.

Armore

NEET-Best Early

4-511 — An excellent variety which resembles the Premier, but is much hardier, larger, better flavored and invariably produces more fruit. Will produce a fine crop the second and third year after planting — a trait not found in any other variety we have grown. Berries are large, perfectly formed, delicious sweet flavor, good quality, firm texture. Very hardy.

PRICE: 25 for \$1.50; 50 for \$2.25; 100 for \$3.50; 250 for \$7.00; 500 for \$11.00; 1,000 for \$18.00.

The Best Late LATE GIANT

4-505 — This variety does not begin to blossom until other varieties are fruiting — so late, in fact, that there will be no waiting between strawberries and raspberries. Berries are dark red all the way through, honey-sweet, with a flavor of a wild strawberry. Berries are giant in size and of good quality. It is a vigorous, healthy grower and very productive. Make a good fruiting row on any soil. Very Red Stele resistant, a very important factor today in raising Strawberries successfully.

PRICE: 25 for \$1.25; 50 for \$2.15; 100 for \$3.15; 250 for \$6.75; 500 for \$9.75; 1,000 for \$17.00; 2,000 for \$32.00.

FAIRLAND RED STEEL RESISTANT

4-507 — An Aberdeen-Fairfax cross. Is an early-midseason variety, ripening but a few days after Premier. Berries are medium to large, bright light-red; excellent freezing qualities; firm, carrying well to distant markets. A variety proven resistant to Red Stele. Heavy plant producer. PRICE: 25 for \$1.25; 50 for \$2.15; 100 for \$3.15; 250 for \$6.75; 500 for \$9.75; 1,000 for \$18.00; 2,000 for \$31.00; 5,000 for \$77.50.

NOTICE — STRAWBERRY PLANTS WILL BE SHIPPED

As weather conditions govern the digging of all Strawberry plants, these will be shipped separate in most cases. Therefore, do not become alarmed if the balance of your order does not accompany — this will be shipped later, or vice versa.

RED CROP

The Newest

JUNE-BEARER

A new June-bearing variety, released by the New Jersey Experiment Station in 1950. Yields so heavy, your first glimpse at your patch during the peak of the harvest, tends to make you think of a "red-cover" — therefore, the name of "Red Crop". In New Jersey yields of from eight to ten thousand quarts per acre have been reported, although

most growers are picking somewhere around five thousand quarts per acre.

Red Crop is considered an early-mid-season variety. Plant growth is quite vigorous, making new runner plants quite freely, producing a very evenly spaced matted row. The berry is medium to large and very uniform in size; it is bright red throughout with no hollow center. It makes an excellent frozen product because of its high inside color. Its pretty bright green calyx make it sell on sight on the fresh strawberry market. Quality of fruit is good, comparing favorably with the well-known Premier. Flavor is of the finest — very sweet and delicious. It has grown well in soils that have had the common red stele root disease.

This wonderful variety more than merits a trial — we know you will like it.

PRICE: 25 for \$1.65; 50 for \$2.50; 100 for \$3.75; 250 for \$7.75; 500 for \$10.00; 1,000 for \$18.00; 2,000 for \$32.00.

Latham Red Raspberry

WILLAMETTE RED RASPBERRY

1-14 — One of the Largest Red Raspberries Grown! A Heavy Producer of Large, Firm Berries. This splendid new variety is an Oregon origination. Berries are very large, conical in shape; very firm, dark red, medium acid. Fruit ripens midseason. An excellent variety for freezing, canning, table use, and to eat fresh from your garden.

Reports seem to indicate this variety is very well adapted to localities where the Latham is poor. In fact, reports we have from Oregon advise it is more widely adapted to their conditions than any other variety, and in sections where Latham is very poor, Willamette has produced 7 tons per acre on good soil. Its large size and firmness make this an excellent variety for shipment to distant markets. Information received from New York state indicate this new variety is very vigorous and productive there and has proven entirely hardy. Order early, supply is limited;

Berries are of good size and high quality, round, and bright red in color, and show no tendency to crumble. Fruit clings more securely to the bushes. It ripens its fruit 3 to 4 weeks earlier than other Fall-fruited raspberries, maturing its crop before the Fall freezes. The summer crop is as early as that of June or about 5 days earlier than Newburgh. **TWO CROPS IN ONE YEAR** The plants are vigorous, healthy and hardy and increased rapidly.

Buy a few plants this year and be well on your way to a fine patch of this wonderful berry. Just the berry for home gardens — provides berries for your table most all season. PRICE: 1-Yr. The fruit is a glossy-black and very large; has a tangy sweet flavor. Is an early ripening kind and bears very young. RA-PID-GRO

The Miracle Plant Food

✓ **Makes A Complete, Quickly Available, Easily Prepared Plant Food By Merely Adding Water.**

✓ **Contains Vitamin B¹ and B² Plus 11 Other Plant Food Elements.**

Read The Facts Below — We Know You Will DECIDE TO USE RA-PID-GRO

What Is RA-PID-GRO? It is a complete concentrated plant food formula. Easily made into an immediate effective liquid fertilizer by simply adding water. It will speed up growth of plants now in place and will assure more successful transplanting of new plants.

HOW Is It Used? Just add water at the rate of 1 pound of Ra-Pid-Gro to 22 gallons of water. Allow to dissolve and it's ready for use. Apply around each plant according to directions on the bag. For use on small numbers of plants, mix at the rate of a teaspoonful to a quart of water. Also very valuable for use when transplanting. Dip plants in solution for three or four minutes. It will work almost unbelievable miracles in promoting rapid and healthy growth on all types of plants, as well as your lawn.

Stop Expensive and Tragic Transplanting Losses. By using a large tub or pail and mixing Ra-Pid-Gro with water at the rate of 22 gallons of water to one pound, you have a solution in which to dip the roots of the plants before setting out. If

this is done, you will practically eliminate transplanting losses. Trees, shrubs, rose, evergreens, and similar plants should be set in the solution 3 to 4 minutes, Berry plants one minute. Vegetable and house plants, just dip and remove.

How Much Will I Need? To estimate your season's requirements of Ra-Pid-Gro figure at the rate of 1 pound of Ra-Pid-Gro for each 100 pounds of other fertilizer you have been using. For a lot 40 x 60 ft. with 15 shrubs, 20 ft. of hedge, 3 fruit trees, 2 evergreens, 12 roses and 800 sq. ft. of lawn, 5 lbs. of Ra-Pid-Gro for a season's feeding.

How Does Its Cost Compare With Other Fertilizers?

Ra-Pid-Gro is less expensive than other fertilizers. In the larger quantities it makes your fertilizer cost about ½c per pound, as against a cost of about 3c per pound for average fertilizers. Remember, 1 lb. of Ra-Pid-Gro makes 176 lbs. of rich and complete plant food.

Ackerman's

New **MONTMAMMOTH CHERRY**

3-312 — This variety was found by Lee McClain, of Knox County, in 1928. A sport of the Montmorency. Bears the second year — no waiting for fruit. High quality cherries are large, often caliper an inch in diameter. As the tree is dwarf and spreading in growth, it is much easier

to pick than other varieties, as the bulk of the crop can be harvested from the ground. Heavy producer — 3 to 5 fruits per spur. The parent tree was one year old when planted, which was 33 years ago, and it produced a

6-gallon crate of fruit the third year. Due to its many fine points, Montmammoth has rapidly taken the place of most all other sour Cherries.

RED DOLGO CRAB

3-327 — We know you will say "Dolgo is the Best Tree on the Place," when it starts to bear. A fruit tree that is attractive enough to plant in your lawn as a flowering crab. Clouds of dainty blooms in early spring, followed by unbelievable "red" fruit. Tree is dwarf

in size, but grows fast. Bears very young, often the second year. Apples are bright red in summer, deepens to blood-red in autumn, then wine-red as leaves turn yellow. Fruit clings to tree until long after frost. Very hardy. Very good for pickles and jellies; sauce has lots of zip and it doesn't taste like usual Apple Sauce. Even when ripe, the fruit has so much pectin that the pickle juice will jell. PRICE: 2-Yr., 3-4 ft. trees, 75c each; 3 for \$2.00; 10 for \$6.00. 4-5 ft. trees, \$1.00 each; 3 for \$2.50; 10 for \$8.00. SEE PAGE 20 FOR BEARING-AGE, RED DOLGO.

3 New Peaches You Will Find Profitable

RED SKIN NEW RED COLOR!

3-324 — Hardy-Productive, Large, Beautiful and Delicious! All five characteristics wrapped up in this one wonderful new Peach. Although this variety was released by the Maryland Agriculture Experiment Station about ten years ago, it is a new variety to the Central and Midwestern states. **Redskin** is a cross between the well-known J. H. Hale and Elberta varieties. Is a freestone peach, ripening with Elberta, and has a beautiful red color. The good qualities of both Hale and Elberta have been combined so that we predict Redskin will eventually become as popular commercially as Elberta is today. The fruit is round and yellow-fleshed with little or no red near the pit, and develops good size even with a heavy load. Delicious flavor, making it ideal for dessert or canning purposes. Excellent shipping qualities.

As this variety is an extremely vigorous grower, we recommend planting not more than 75 trees to the acre. Also, as Redskin is both winter-hardy in bud and cold-resistant in blossom, the tree will produce exceptionally heavy loads of Peaches, you will have to thin very heavily so as to prevent tree breakage, and at the same time, be assured of real large fruit.

Redskin is self-pollinating. Due to its red color, size and excellent qualities, superior prices have been received for this variety during the Elberta season. Supply is very limited—order early.

PRICE:	Each	10	100

YELLOW-GOLD GIANT

1-39A In our estimation, the BEST yellow Peach introduced to date. **HARDINESS — GREAT BEAUTY — HIGH QUALITY** all in one wonderful peach! A peach that has everything desirable in a yellow free-stone, including hardiness. Peach is exceptionally large, perfectly round, and so brilliant yellow in color it appears to be "shimmering gold" — so yellow, in fact, one does not notice that it has a slightly red cheek. Fruit is equally as large as the well-known J. H. Hale, but is self-fertile; is highly flavored and an exceptionally good variety for canning. Skin is very firm, which means excellent shipping qualities. Yellow-Gold Giant ripens about the same as Elberta — early in September. This is a self-fertile variety and a freestone. Tree is hardy and a good producer.

This is a "must" for every gardener who makes a specialty of including only the best in plantings. Supply is limited — order early.

← NECTARINE

1-39 — This delicious fruit is a cross between a Peach and Plum. Resembles a Peach in shape, size and flavor. Smooth skin, similar to that of a Plum; many fruit lovers call it the "Fuzzless Peach". Excellent for canning or as a fresh fruit. Plant two or more trees for proper pollenization.

No more fuss with a lot of different sprays — use ACKERMAN'S ALL-PURPOSE Spray for fruits, berries and ornamentals. This Spray is a combination Insecticide and Fungicide, already mixed. All you do is mix it in water and spray. You can use this one spray most all season.

EASY TO USE. No guessing, no fussing — buy just the one package and use it for different fruits at various times during the season, also for **Ornamentals**, for it checks Red Spiders on Evergreens and certain other insects and fungi that attack ornamental shrubs.

ACKERMAN'S ALL-PURPOSE SPRAY Helps Control These Diseases: Blotch, Brown Spot, Leaf Spot, Bitter Rot, Cedar Rust, Leaf-Curl, and these insects: Aphis, Bagworm, Curculio, Leaf Rollers, Plant Lice, Coddling Moth, Leaf Hoppers, Oriental Fruit Moth and Red Spiders.

HOW MUCH TO ORDER. One lb. with 20 gallons of water — enough to spray 4 average size fruit trees, 5 times during the season; about half that much for young trees not yet bearing.

DEVELOPED, TESTED AND APPROVED by University of Missouri. The Formula was developed by Dr. Swarthout of the University of Missouri, tested by him.

PRICE: Postpaid, 1 pound \$2.25, 4 pounds \$7.75.

The finely cut foliage allows enough light to filter through to promote excellent growth of lawns, yet provides shade dense enough to discourage growth of crabgrass. Very little pruning is needed as the lower limbs self prune as the tree grows. As it is sterile, there are no unsightly seed pods to clutter up the lawn. Tests show this new tree to grow more rapidly than either Silver Maple or Chinese Elm. It withstands drought, heat and cold. TREE PEONIES are a low many branched shrub, growing 3 to 4 feet high, bearing giant size flowers in many shades of red, pink, purple, white and bi-color. They have been grown in China for a thousand years, first in the gardens of the Ming Emperors, where they gained the name "THE IMPERIAL FLOWER OF CHINA". The Chinese also call them "THE KING OF FLOWERS" because of their rare beauty and king-size blossoms. The flowers often measure 10 to 12 inches across, and have the texture of fine crepe silk. They are fragrant. They are hardy — long lived — disease resistant. Grow well in any climate. Have been known to withstand 40 degrees below zero temperature. Need very little care. The sparkle and beauty of TREE PEONIES in full bloom are beyond description, and are even more spectacular and beautiful than the finest hybrid Rhododendron.

ORNAMENTAL TREES

RED SILVER FLOWERING CRAB

3-227 — In our opinion, the most colorful Flowering Crab ever introduced! Completely red in flower, leaf bark and fruit—rich maroon-red from top to bottom. Most flowering Crabs are preferred due to the mass of blooms which they produce for a short time, but the Red Silver is beautiful from spring until late fall because of its all-over red color. The leaves are somewhat cut-leaf, the under side of which are somewhat tinselled with silver—the blend of maroon and silver is a unique combination throughout the season. The wonderfully fragrant red flowers are large, partially double and altogether lovely. Delightful red fruits in the fall. **Price: 2-Yr., 3-4 ft., \$2.25 each; 2 for \$4.00.**

Easily grown, long lived and one of the most colorful of all trees. Medium to tall grower. HEDGE PLANTS

2-144 — **GREEN BARBERRY** (*Berberis Thunbergi*). Immune from rust. Dwarf growing, uniformly bushy and rounded in form, numerous leaves covering thorny twigs. As a filler edging for shrubbery, as foundation screen in front of porches, as a hardy, low hedge, it is unsurpassed. **Price:** 2-Yr., 12-15 in. field-grown, transplanted bushes, 6 for \$1.95; 12 for \$3.25; 25 for \$5.85; 50 for \$10.50; 100 for \$18.00.

2-145 — **RED BARBERRY**. Similar to Green Barberry in all respects except color is a brilliant red. Early spring, assumes a deep, bronzy-red color, which it retains until fall, when it changes to vivid orange, scarlet and red shades, far more brilliant than the ordinary Japanese Barberry. **Price:** 2-Yr., 9-12 in., field-grown, transplanted bushes, 45c each; 6 for \$2.15; 12 for \$3.80; 25 for \$7.00; 50 for \$12.50; 12-15 in., 55c each; 6 for \$3.00; 12 for \$5.25; 25 for \$10.00; 50 for \$18.50. 3-Yr., 18-24 in., 65c each; 6 for \$3.50; 12 for \$6.85; 25 for \$13.75; 50 for \$25.00. **REMEMBER**, Our Barberry are not SEEDLINGS out of beds, but are strong, field-grown TRANSPLANTS. There's a difference.

3-234 — **CHINESE ELM**. Chinese Elm makes one of the finest of hedges. Especially desirable for states of light rainfall and where extreme hardiness is required. The hedge, limbs clear to the ground, is a bright rich green from very early spring, as it is much earlier than other hedges and carries the foliage, which colors with frost, way into the fall. Trim same as Privet or other hedges. 2-Yr. 2-3 ft., 6 for 85c; 12 for \$1.60; 25 for \$2.75; 50 for \$4.25; 100 for \$7.75.

2-99 — **AMOOR RIVER NORTH PRIVET**. One of the best hedge plants because of its extreme hardiness. It is of similar form and habit to the well-known California type, but much hardier. Of fine, upright growth with lustrous dark green foliage, nearly evergreen. Grows quickly, making a hedge the first year, and succeeds in practically all soils. Especially valuable for hedges and borders in cold, exposed locations. When planting, cut back to 4 inches above ground to make hedge bushy at bottom. **Price, 2-Yr., 18-24 inch, 6 for \$1.80; 12 for \$3.25; 25 for \$5.25; 50 for \$8.75; 100 for \$14.50. 2-3 ft., 6 for \$2.00; 12 for \$3.50; 25 for \$6.50; 50 for \$11.00; 100 for \$20.00.**

3-366 — **BLUE LEAF ARCTIC WILLOW**. (*Salix purpurea nana*.) Here is a dwarf bush that is distinctly different in the way of a hedge plant. Foliage is of unusual blue-gray-green. Hardy enough to withstand Arctic Circle temperatures. Grows everywhere, even in wet or heavy soils where nothing else will thrive. Matures into a beautiful, thick hedge, up to 4 feet tall, and can be used favorably as a specimen. This Blue Leaf Willow is still uncommon and will attract attention and favorable comments wherever seen. Can be clipped for formal effect, or allowed to grow naturally, as it makes a dense globe-shaped bush. Be sure and get in on this unique and very enchanting hedge for we know they will be the envy of your neighbors. **PRICE:** 2-Yr., 15-18 in., 6 for \$2.50; 12 for \$4.25; 25 for \$7.50; 50 for \$13.00. 2-Yr., 18-24 in., 6 for \$3.25; 12 for \$6.00; 25 for \$8.95; 50 for \$16.00.

SURE TO FRUIT BITTERSWEET

2-105—(Celastrus Loeseneri). Chinese Bittersweet. The most prolific fruiting variety known. The ordinary Bittersweet often fails to fruit. In this variety we offer you a Bittersweet that always fruits. Even one vine if planted alone will fruit, but we recommend that you plant two close together and take advantage of the resulting cross pollination. It's worth it. This rare species was imported from Central and Western China. The leaves are a glaucous green and somewhat larger than those of the common Bittersweet. It grows rapidly in any kind of soil, in sun or partial shade. In autumn yellow and orange-scarlet berries cover the vine all over instead of an occasional small cluster as in the common kind. Excellent for late fall and winter bouquets. **Strong vines, 70c each; 2 for \$1.25.**

The Department of Agriculture estimates that insects do over a billion dollars' damage a year to our crops, while the value of birds in combating these insects is over 300 million dollars. Besides their value in destroying insects, many species help in keeping down weeds. Offer the birds board and lodging by planting berry producing shrubs, and you will have a host of willing helpers, working tirelessly for you throughout the whole year.

Insect-eating birds flock to farms where a side dish of brilliant shrubs and tree berries has been planted.

Sub-Zero ROSES

Easy to Grow — Long to Live — Save REPLACEMENT EXPENSE

These are the famous Brownell Sub-Zero Roses — a New Race of hardiness previously unknown in Roses. They are more vigorous, can live many times longer, are easier to grow, bloom more abundantly and more consistently, and their size, form and color compare with the best of the common Roses. Why? Because they are bred back to hardy species. They are super-hardy roses that absolutely won't kill out even in temperatures that dip 25 degrees below zero. The technical meaning of our "Sub-Zero" is wood safe to about 15 degrees below zero unprotected; hilled up with a little clean dirt 25 degrees below and colder; well hilled up about 95% safe at 50 degrees below. Because they are so hardy we guarantee them unconditionally to live through one year without winter killing. Best of all they are free blooming, and the flowers last a long time. We are offering this unique strain of roses in Hybrid Teas only as listed below:

2-189 — Curley Pink. Matchless in size and form of bloom, beauty of cluster, vigor. Many large, two-toned pink blossoms, of over 50 gracefully recurled petals.

2-192 — Orange Ruffles. One of the most beautiful Roses of all time. A gorgeous new color of orange never before found in Rosa. It is luminous like glowing sunshine in the rain. Large flowers most singly on stems constantly in great abundance. As many as 50 petals gracefully warped, curled, frilled and ruffled, artfully shading from Capricorn Orange through Saturn to Saffron yellow.

2-191 — Queen o' The Lakes. The queen of all the double red.

2-193 — V for Victory. Most beautiful, large, very double, yellow, fragrant Roses; constantly blooming.

PRICE: All varieties listed \$1.75 each; 3 for \$5.00. Net, no further discount.

Four Outstanding Everblooming

HYBRID TEA ROSES

The "Elite" of the Rose Family!

2-182 — COUNTESS VANDAL. You will look a long time to find anything finer in the salmon-pink class than the Countess. It continually produces lovely long tapered buds of salmon-pink shaded with copper and gold which open to big, long-lasting, richly fragrant flowers on fine stems. Buds and flowers are usually perfect no matter what the weather, and the plant thrives and blooms consistently wherever roses are grown. **Price: \$1.00 each; 3 for \$2.80.**

2-33 — CRIMSON GLORY. The beautiful, flaring, urn-shaped buds open into magnificent flowers of velvety crimson with black and maroon shadings. The richly perfumed bloom seems to glow like an ember when light is reflected from its velvety petals. Despite keen competition from more recently introduced red roses, Crimson Glory continues to be one of the most popular varieties in its color throughout the nation. The plant produces a continuous succession of flowers. **Price: \$1.00 each; 3 for \$2.80.**

2-48 — ECLIPSE. In our opinion no rose garden worthy of the name is complete without this variety. You will find yourself going to it again and again to cut the spicily fragrant, exquisitely beautiful buds. Of chrome yellow, they are slender, urn-shaped, and often more than two inches long. The plant is very vigorous, rather erect in habit, and always well covered with dark green leathery foliage. **Price: \$1.00 each; 3 for \$2.80.**

2-42 — KONIGN LOUISE. Beautiful ivory-white buds, about as perfect as any you will ever find, open to large, fully double globular flowers of milk-white. Splendid healthy plants and a good bloomer. **Price: \$1.00 each; 3 for \$2.80.**

Jumbo Red Grape
Large as a Quarter

The Giant of all Grapes — Individual Kernels Size of a Plum. We introduced this variety in 1946. We believe it came from a sport or seedling as one vine was found in a vineyard of Concord some ten years ago; the fruit is entirely different than any variety we have ever seen. An amber-red when ripe, with individual kernels the size of a plum — we state large as a quarter, but in reality they are much nearer to being the size of a fifty cent piece. In many cases. Bunches are compact, weighing one to two pounds. Very hardy. Will grow on most any soil. Makes one of the prettiest and tastiest jellies we know of — a bright, sparkling red, with a flavor all its own — not like common grape jelly.

As usual, our supply is very small, and we are again limiting each customer to twelve plants.

PRICE: 1-Yr. vines, 50c each; 6 for \$2.40; 12 for \$4.00. 2-Yr. vines, \$1.00 each; 3 for \$2.75; 6 for \$4.75.

ROYAL RED LEAF PEACH

An ornamental tree with RED FOLIAGE — bright red early in the spring, gradually dulling to a deep maroon towards fall. Its deep rose blossoms against the red foliage create a most pleasing contrast. Produces full crops of perfectly round, inch and a half diameter peaches — just right for pickling. Fruit has all over red coloring; flesh is white with a delicious sweet flavor. Ripens late, with the Gold Drop. Our strain is far redder than foliage on most trees offered by other growers and therefore have named ours "Royal", this assures you of the genuine red strain.

PRICE: 1-Yr., 3-4 ft. trees, \$1.25 each; 2 for \$2.00; 5 for \$3.75. 4-5 ft. \$1.75 each; \$2.75 for 2.
